TUTORIAL – 13

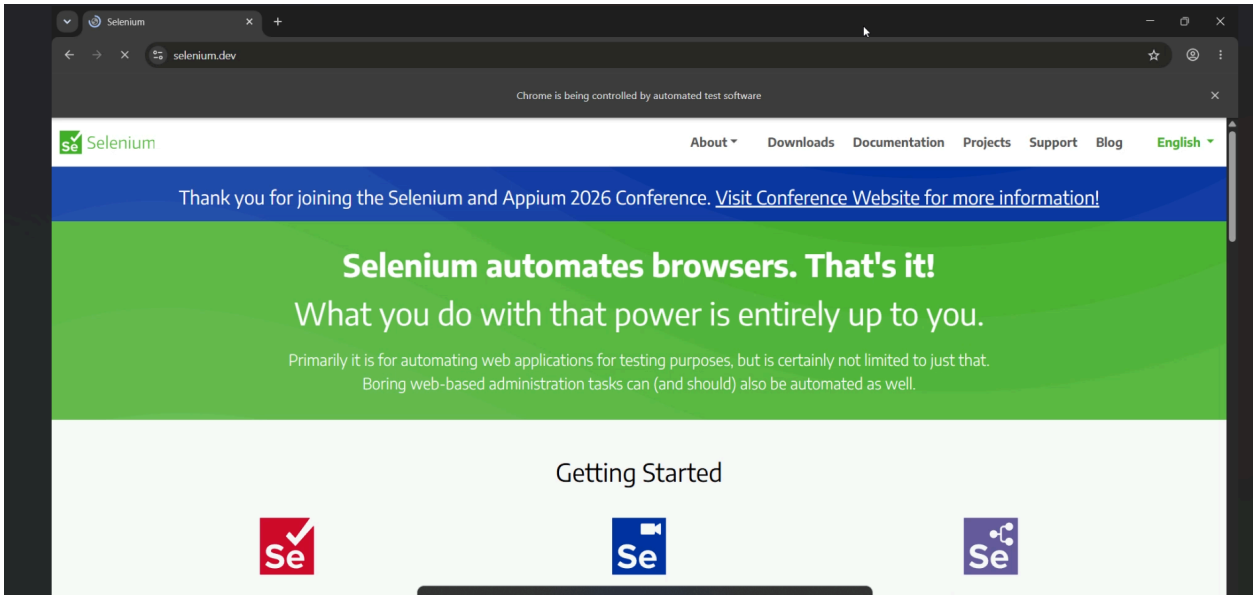

Selenium Environment Setup

Aim: To create and configure Python, Selenium WebDriver, PyCharm IDE, browser drivers and automation testing libraries for Selenium testing.

SOURCE CODE:

```
 from selenium import webdriver
driver = webdriver.Chrome()
 driver.maximize_window()
driver.get("https://www.selenium.dev/")
print("Browser launched successfully")
print("Page Title:", driver.title)
print("Current URL:", driver.current_url)
driver.quit()
```

Thank you for joining the Selenium and Appium 2026 Conference. Visit Conference Website for more information!
Selenium automates browsers. That's it!
What you do with that power is entirely up to you.
Primarily it is for automating web applications for testing purposes, but is certainly not limited to just that.
Boring web-based administration tasks can (and should) also be automated as well.
Getting Started
